

Jathin Sagar Akasapu

Email: ajsagar007@gmail.com Mobile: +91-8500308001

INTRODUCTION:

Graduate in Computer Science and Engineering with **7+ years of IT experience** in design, development, testing, and implementation of web applications using **Angular, Node.js, JavaScript/TypeScript, HTML5, CSS3, Bootstrap, REST APIs, and Generative AI integrations**. Currently associated with **Capgemini**, Hyderabad.

EMPLOYMENT SUMMARY:

- January 2025 to Present as C2 / Manager at **Capgemini**.
- March 2021 to January 2025 as Senior Front-End Developer at **Accenture**.
- September 2018 to March 2021 as Web & Mobile Application Developer at **Charita Technocentra Pvt. Ltd.**

PROFESSIONAL SUMMARY:

- 7+ years of experience as a Front-End/UI developer with strong expertise in building complex, scalable, and responsive enterprise web applications.
- Hands-on experience in system analysis, UI design, workflow architecture, development, testing, deployment support, and application maintenance.
- Strong experience developing interactive web applications using JavaScript, TypeScript, HTML5, CSS3, JSON, Angular, Bootstrap, and RESTful API integrations.
- Working knowledge of MEAN/MERN stack concepts with practical experience in Angular and Node.js-based application development.
- Good exposure to Generative AI application development, including AI-powered chat interfaces, document analysis workflows, Azure OpenAI integrations, and enterprise knowledge assistants.
- Proficient in building reusable Angular components, services, directives, pipes, reactive forms, validators, routing modules, observables, and RxJS-based workflows.
- Experience working with Angular lifecycle hooks, structural and attribute directives, custom directives, and state-management concepts such as NgRx.
- Strong foundation in TypeScript, JavaScript, DOM manipulation, responsive UI design, accessibility-aware development, and web standards.
- Experience using Azure DevOps, Bitbucket, and GitHub for repository management, branching, commits, pull requests, and code collaboration.
- Worked extensively in Agile/Scrum development environments using Jira, Azure DevOps, and Trello for sprint planning, tracking, and delivery.

EDUCATIONAL BACKGROUND:

- Bachelor's Degree in Computer Science and Engineering, MVGR College of Engineering, Andhra Pradesh.

TECHNICAL SKILLS:

Frontend: Angular, JavaScript, TypeScript, HTML5, CSS3, Bootstrap, Ionic, Responsive Web Design

Angular: Modules, Components, Data Binding, Routing, Observables, Structural & Attribute Directives, Pipes, Component Lifecycle Hooks, Reactive Forms & Validators, NgRx, RxJS, @HostListener, @ViewChild, @Component

Backend / Full Stack: Node.js, Express.js fundamentals, RESTful API integration, JSON

MEAN / MERN: Angular, Node.js, Express.js fundamentals, MongoDB concepts, React.js fundamentals

Cloud / AI / Tools: Azure OpenAI, Azure DevOps, GitHub, Bitbucket, Jira, Trello, ServiceNow integration, Document Intelligence concepts

Client: Caterpillar

Project: VisionLink Fleet Management

Description: Cat VisionLink is a fleet management system developed by Caterpillar for monitoring and managing fleets of construction and mining equipment such as bulldozers, excavators, and trucks across construction, mining, agriculture, and related industries.

Role: Angular Developer

Achievements: Received the iChamp Award during the joining year and earned a promotion in the second year.

Responsibilities:

- Owned assigned features/modules and provided accurate development estimates.
- Collaborated with team members and provided technical support whenever required.
- Performed technical feature breakdown and reviewed implementation approaches with the architect.
- Conducted code reviews for junior developers to improve code quality and maintainability.
- Worked on key features including:
 - CAT Support for customer/dealer impersonation.
 - Manage Notifications for email/text communication through the front-end application form.
 - Asset inclusion by selecting assets from available lists.
 - QR code implementation for asset capturing.
 - Exporting on-screen table data into formatted files such as .xls and .xlsx.

Client: Erimish

Project: Erimish E-commerce Web Portal

Description: Erimish is a boutique stackable bracelets and jewelry brand focused on empowering women to express their personal style. The application enhanced customer experience by enabling order holds for future purchases and supported automated order staging workflows.

Role: Angular and Node.js Developer

Responsibilities:

- Developed and enhanced the Wholesale Application Form by updating business logic based on client requirements.
- Implemented validation logic to fetch existing retailer details located within a 5-mile radius of a new wholesale applicant store.
- Developed logic to set expiration dates for draft orders created through Shopify, a cloud-based SaaS platform.
- Implemented the out-of-stock items feature to improve product availability handling.
- Implemented the Job Application Form with required validations and workflow support.

Client: AIG

Project: GEN AI Applications

Description: Designed and developed enterprise-grade Generative AI application interfaces for code intelligence, IT operations automation, enterprise knowledge assistance, form rationalization, and underwriting decision support. Built responsive and reusable UI components integrated with Azure OpenAI, ServiceNow, internal knowledge sources, document intelligence, and AI-driven analytics to improve productivity, reduce manual effort, and accelerate business workflows.

Role: UI Developer – GEN AI Applications

Responsibilities:

Code Explainability

- Developed a UI module that accepts repository URLs and delivers AI-powered code understanding for complex applications.
- Integrated Azure OpenAI-driven insights to summarize functions, logic flows, dependencies, and key implementation patterns.
- Built intuitive visual components to present readable code insights and accelerate developer onboarding.
- Reduced analysis effort for legacy codebases by enabling faster and more structured review of application logic.

Triage Assistant

- Created a conversational UI to automate triaging of Incidents, Problems, and Defects sourced from ServiceNow.

- Implemented AI-assisted priority detection, category mapping, assignment recommendations, and next-best-action suggestions.
- Designed structured response layouts to clearly display reasoning, ticket context, and recommended routing actions.
- Improved IT operations efficiency by accelerating ticket routing and reducing repetitive manual analysis.

AIG AI Chatbot / AIG Copilot

- Developed a chat-based interface that enables employees to access enterprise knowledge through AI-powered conversations.
- Integrated context-aware responses using Azure OpenAI and internal enterprise data sources.
- Built reusable Angular components for streaming responses, guided suggestions, prompt actions, and conversation handling.
- Enhanced employee productivity by enabling quick access to policy, IT, and process-related answers.

Form Rationalization

- Built UI workflows for form upload, preview, comparison, and AI-driven similarity scoring.
- Integrated document intelligence capabilities to identify redundant, duplicate, and overlapping forms across departments.
- Developed dashboards displaying form groupings, similarity percentages, rationalization insights, and review outcomes.
- Supported documentation governance by helping teams reduce duplicate forms and streamline form management.

UW Companion / Underwriting Companion

- Designed UI components for document uploads, previews, AI-generated summaries, and underwriting insight presentation.
- Integrated AI models to extract key entities, highlight risks, and generate actionable underwriting observations.
- Enabled side-by-side comparison of multiple documents with structured AI outputs and summary views.
- Improved underwriting decision cycles by supporting faster and more accurate document analysis.

PERSONAL INFORMATION:

- Father's Name: Siva Prasad Akasapu
- Mother's Name: Bharathi Akasapu
- Marital Status: Single
- Nationality: Indian
- Permanent Address: Plot No. 435, Flat No. 202, Sai Pride, Mathrusrinagar, Miyapur, Hyderabad – 500049

DECLARATION:

I, Jathin Sagar Akasapu, hereby declare that the above information is true to the best of my knowledge. I am also confident in my ability to work effectively in a team.

Place: Hyderabad
