LinkedIn: <https://www.linkedin.com/in/sriya-reddysetty> | GitHub: <https://github.com/SriyaR-01>

SKILLS

Frontend Technologies: Angular (v9–v18), JavaScript (ES6+), TypeScript, HTML5, SCSS, CSS3, Angular Material, Bootstrap, RXJS, Responsive Web Design

Architecture & Design: Component-Based Architecture, Single Page Applications (SPA), Micro Front-end (Basic Knowledge), RESTful API Integration, JWT Authentication, OAuth 2.0, Angular Routing, Reactive Forms, Dependency Injection, Lazy Loading, Code Splitting, Responsive Web Design, Performance Optimization, Reusable Components

Testing & Build Tools: Jasmine, Karma, Git, GitHub, Azure DevOps (CI/CD Pipelines), npm, Postman, Lighthouse, Core Web Vitals

Methodologies: Agile, Scrum, SDLC, Code Reviews, Branching Strategy, Continuous Integration & Continuous Deployment

WORK EXPERIENCE

Accenture, Hyderabad
Clients

Aug 2021 - Present

CVS Health | Software Developer Analyst

Aug 2025 – Present

- Engineered scalable enterprise web applications using **Angular, TypeScript, HTML5, and SCSS**, delivering 15+ business features while improving application stability and maintainability.
- Designed and developed **25+ reusable and responsive Angular components** using Angular Material, Routing, Dependency Injection, and Reactive Forms, reducing development effort by **40%**.
- Integrated **RESTful APIs** using Angular HTTP Client and RxJS Observables, improving application performance and reducing data loading time by **30%**.
- Strengthened application security by implementing **JWT authentication**, Route Guards, and role-based authorization while following **OWASP security best practices**.
- Optimized application performance through **Lazy Loading, Code Splitting, Change Detection optimization**, and monitored performance using **Lighthouse** and **Core Web Vitals**, reducing page load time by **20%**.
- Developed comprehensive **unit test cases using Jasmine and Karma**, participated in peer code reviews, debugging, and Git branching strategy to ensure high-quality releases.
- Collaborated with UI/UX designers, backend developers, QA engineers, and Product Owners to successfully deliver multiple production releases following Agile methodologies.

Caterpillar | Software Developer Analyst

Jan 2023 – Aug 2025

- Developed scalable Angular applications using **Angular, TypeScript, HTML5, SCSS, and Angular Material** following enterprise coding standards.
- Created **30+ reusable Angular components, directives, and shared modules**, reducing feature development effort by **40%**.
- Built **20+ REST API integrations** and developed **15+ Reactive Forms** with custom validation, improving user experience and streamlining business workflows.
- Improved application performance by **30%** using efficient component rendering, Lazy Loading, bundle optimization, and reusable architecture.
- Increased unit test coverage to **85%** using **Jasmine and Karma**, reducing production defects by **25%**.
- Conducted code reviews, resolved production issues, and collaborated with multiple teams to ensure successful sprint deliveries.
- Worked with modular frontend architecture and gained exposure to **Micro Front-end architecture** implementation.

IHH Health | Software Developer Associate

Dec 2021- Dec 2022

- Built responsive healthcare applications using **Angular, HTML5, SCSS, Bootstrap, and Angular Material**, increasing mobile appointment bookings by **25%**.
- Integrated **15+ secure RESTful APIs** using JWT authentication, HTTP Interceptors, and Angular Services, reducing authentication-related issues by **25%**.
- Refactored legacy styles into a modular **SCSS architecture**, reducing bundle size by **18%** and improving maintainability.
- Enhanced user experience by optimizing responsive layouts across desktop, tablet, and mobile devices, reducing UI-related defects by **20%**.
- Optimized application performance by minimizing unnecessary API calls, improving rendering performance, and resolving frontend defects through debugging.

EDUCATION

Vidya Jyothi Institute of Technology, Hyderabad

Aug-2017 – Jun-2021

B. Tech Computer Science and Engineering

CGPA – 9.5/10

Relevant Coursework: Data Structures and Algorithms, Object-Oriented Programming (Java), Database Management Systems, Operating Systems, Computer Networks, Software Engineering, Web Technologies, Advanced Programming Concepts

CERTIFICATION

-
- Angular – The Complete Guide, **Udemy**
 - JavaScript Data Structures & Algorithms, **Coursera**

ACHIEVEMENTS

-
- Recognized with the **Client Excellence Award** for delivering high-quality, scalable Angular applications.
 - Reduced UI load time by **35%** through Angular performance optimization and efficient component rendering.
 - Reduced page bundle size and load time by **20%** using Lazy Loading, Code Splitting, and bundle optimization.
 - Improved application responsiveness by **30%** through optimized Change Detection, reusable component architecture, and RxJS optimization.
 - Increased application quality by implementing comprehensive unit testing, peer code reviews, and secure coding practices using **JWT authentication** and **OWASP guidelines**.
